Ayan Choudhury

Startup Enthusiast, Aspiring Entrepreneur, Workaholic, Listener & Learner

ayay700@gmail.com

Summary

Welcome to my LinkedIn profile...

An Entrepreneur from Kolkata. A Startup Enthusiast. I am a startup enthusiast who is always looking for new opportunities! I am trying to built my very new startup named 'TheoreX' which is E-Learning & Engagement Based Startup in my spare time. I built TheoreX keeping in mind one thing that it will increase the employability level in the market for aspiring Engineers and Tech-Lovers and other educational fields too. I am a Doer, no a Dreamer, whatever I want to execute, I try to finish off with the same within the deadline and I love to maintain schedule daily! Not a giving up mentality!

Beside that, a Wikimedia Developer , a Mozilla Representative from India pursued B.Tech degree course in Information Technology at Techno India, Kolkata. My focus always has been on aspiring technologies, innovative thinking and to learn new things more and more. As an active volunteer, I have always organised sessions and workshops for students on technologies which are not covered in university curriculum at all and also I try to motivate them to do something on their own.

I like to learn by exploring & take active interest in modifying configurations of different fields in order to get a better understanding. I enjoy going through tech blogs, Entrepreneurial Blog and sharing knowledge via social media & other connections.

I hope people will love to connect with me to share their knowledge. Thank You.

11. Setting up the culture of the company

Experience

Chief Executive Officer at   TheoreX

July 2016 - Present (9 months)

Trying to build something new in my free time!

TheoreX is based upon student's empowerment and how we can increase the employability level in the market by giving them different kinds of opportunities. Our platform is targeted towards making students and professionals who wants to increase their employability skills. TheoreX is based upon three different parts and those are E-learning, Execution and Engagement. All these will be provided in one platform in a very decent package and soothing workflow compared to others. Consumers will learn from TheoreX's e-Learning portal, they will share and increase their experience in our Open TheoreX Forum and also they will showcase their past as well as ongoing projects in our portal so that prospective employers can verify the worth of a particular individual; also which will help our users to increase their employability level in industry. At TheoreX, we don't only believe in just Learning, We believe in Creative Learning, moreover Execution, Experience and Results. That's why we want our consumers to Learn, Create & Execute in our portal increasing their employability level with TheoreX.

Objectives

• Student's Empowerment

• Consumers Engagement

• Increasing the employability level in industry

• Organizing free/paid hackathons, webinars, seminars, events, workshops for our Consumers

• Providing consumers the best & latest product, which they will always love to use

• An Online Community driven program

• Growing a huge professional network over an Online Community Driven Program

• Hassle Free, Reliable and Time saving services for all the consumers

• Free Consultancy regarding any topic in our Open Forum

• Online Free/Paid Live Classes by top instructors in respective subjects

Chief Financial Officer at   TheoreX

July 2016 - Present (9 months)

Trying to build something new in my free time!

Business concept is making the youth more efficient with technology. At TheoreX we aim at providing one step solution by efficiently training the freshman and sophomore year with the exquisite and new breeding technologies which will be staying in the market and will be securing their future. Not only they will learn but also they can stay engaged with other consumers or professionals in our Open Forum and they can execute their skillset at TheoreX and increase the employability level. In future when TheoreX will tie up

with different Corporate Organizations, they can visit TheoreX portal and can directly recruit candidates going through their showcased projects, Open forum activities.

TheoreX is going to unique by its execution plan. At TheoreX, as an E-Learning portal we are probably the very first to introducing Motion Graphic E-Learning Videos to make consumers less bored and more interested. Video will be made with a creative blend of Motion Graphics, Screen Casting & Top Instructor Lectures, which will be completed & the user will get certified and a recognition letter from Team TheoreX, if and only if the user pass the Assessment Test at the end of every topic. Overall we will be making one student professional through our E-Learning Videos. During the journey of learning they can get engaged in our Open Forum or they can connect with other professionals through TheoreX Portal. After that they can showcase their projects whatever they have done or their ongoing projects by uploading files or folders or images or making videos of his/her projects or attaching the specified links of their live projects. After that recruiters from different organizations will go through their projects and hire the best employee accordingly! We are giving a single place for consumers to Learn, Create, Execute and at very last to get hired by famous Corporate Organizations. This will make TheoreX successful in its long journey.
